Boyd's PLANTING NEWS and BETZ VICTORY GUIDE

F. C. BOYD
of McMinnville, Tenn.

THE LATE FRANK S. BETZ
of Hammond, Indiana

Dear Customer:

It is with pleasure that we present our "Betz Victory Guide" and "Boyd Planting News". Mr. Frank Betz of Hammond, Indiana, well known to many of our customers, wanted us to carry on the work that he was so vitally interested in. Since the death of Mr. Betz two years ago, we are trying to keep in touch with his customers and do our part in the noble work he started years ago.

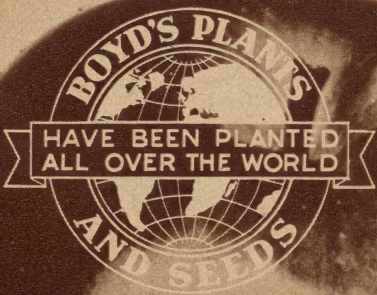

This year we urge you to grow more fruits. "Join the Victory Garden Program" and help in every way to keep from burdening your already over-loaded freight and truck lines. Failing to grow your own food may endanger a Soldier on the front lines from getting the proper food that he needs to help keep our Nation free. So, you can see that you can help a lot by growing more fruits.

Also, we are offering, as we have been for years, Reforestation seedlings, shade trees, and shrubs. We have been cooperating with our State Department of Forestry and with the Agriculturist and Horticulturist of our State and other States, in the reforestation of land that is not needed. Our timber is lower now than it has ever been in the history of our nation and if we don't start planting back where timber has been cut, some day timber will be priceless. Our Federal and State Governments want you to take care of the timber you have and plant more when possible.

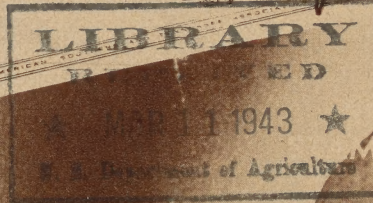

Plant Fruits and Reforestation tree seedlings now so that your Children and Grandchildren will not have to suffer. Such a move is patriotic and will yield an income value of your property. Remember "Victory" is not a gift—it is achievement won by careful planning and hard work.

Help morale by planting and dressing up the home grounds for the soldiers when they return home and Victory is ours. "It's a home worth fighting for when it's planted".

Yours very truly,
F. C. Boyd
Manager
BOYD NURSERY COMPANY

ALL STOCK SOLD F. O. B.,
McMINNVILLE, TENNESSEE

County Agents

There is no more important work in your entire county than the work you do every day as part of your regular job. Sometimes you may think the pay is small but you are both teaching and learning whenever you put one of your farmer friends on the right track. In this generation you may live to see the fruits of your work reflected in happier, more prosperous citizens of your community.

Perhaps there are some items in this folder that will help you to solve the problems that are facing land owners near you. Read it over carefully and if you would care to have additional copies for free distribution they are yours for the asking.

School Teachers

Do you wonder sometimes where you can get new material for your daily talks to your pupils? Try passing up the regular English class some day and use the time in discussion of some of the articles in this paper. New interests will be aroused and you will be doing an excellent service for the entire community. IF YOU WANT ADDITIONAL COPIES FOR CLASS STUDY AND QUIZZES, we will send them free.

We never knew a professor or teacher who didn't like to grow things himself; it might be dahlias, irises, peonies or just plain petunias but they invariably do a good job with whatever they grow. Many fine hours, with profit attached, await you if you care to plant some of the trees or shrubs listed in this folder. Look it over and notice how your interest and enthusiasm rise.

Build Brush Dams

The soil that is washing away must be stopped and it is up to the individuals to put a stop to it, and we are suggesting some ways that are cheap and still the best that we know of to put a stop to gullies and hillsides washing away. Get the brush if possible when the leaves are on the trees or branches of the trees and stack them crosswise of the ditches, driving some stakes so as to hold the brush, and it will start holding the dirt that is washing away, and if you wish, if the gullies be very bad, another thing to do would be get some Hall's Honeysuckle vines, plant in the ditches above and also below the dams, and they will be very helpful in holding the dirt that is heading down stream.

Win a Victory Bond!

Think Of It! 38 Free Prizes . . . Here They Are:

First Prize—\$25.00 Victory Bond.

Second Prize—\$10.00 in War Stamps.

Third Prize—\$5.00 in War Stamps.

Ten Prizes of \$1.00 each in War Stamps.

Twenty-five Prizes of \$1.00 each of Boyd's plants.

Here is all you have to do to enter the contest. Write a letter of not more than 200 words explaining "Why We Prefer Boyd's and Betz Plants," and send a picture showing the results of nursery stock purchased from Boyd's. Attach to your order of not less than \$3.00 worth of plants selected from this folder.

Please send your extra pictures, as no picture will be returned. We will pick the best pictures and the best letters and award winners in rotation. Thirty-eight prizes will be awarded. "The Old Dirt Dobber" will be the judge.

All letters and pictures will become the property of Boyd's and they reserve the right to use any of them in their advertising in any way they desire to do so.

Prizes will be awarded in January, 1943. Contest closes December 15, 1942. Winners will be announced in our Spring catalogue.

The Old Dirt Dobber

If you are one of the millions who enjoy growing things as a delightful hobby you will be interested in listening to "The Old Dirt Dobber" who broadcasts garden information every Saturday morning over the entire network of the Columbia Broadcasting System. The time is 10:15 to 10:30, Central War Time. He is an intimate personal friend of ours and you can depend on his advice and instructions.

Doctors

More than any other professional man, perhaps, the doctor needs a hobby. His working hours are so irregular and his work so exacting that he finds it necessary to relax for a few hours occasionally and relax.

THERE ARE THOUSANDS OF DOCTORS WHO GROW THINGS—flowers, trees, etc., as their recreation. Some of the outstanding developments in horticulture have been made by doctors who engaged in this work as a hobby.

EVERY YEAR AN INCREASING NUMBER OF DOCTORS order plants and tree seedlings from us and begin this pleasant and profitable activity. Some use a city backyard or vacant lot; others plant small acreages in the country. This gives them pleasant hours out of doors and also adds quite materially to their income.

IN THESE PAGES THERE ARE DOZENS OF SPECIAL ITEMS THAT WILL APPEAL TO DOCTORS. If you have already started this interesting work, why not add a few new things this year and then pass this list on to some patient who needs this prescription himself?

In making your rounds you see examples every day of farms that have suffered from soil erosion—farms that no longer pay their own way. IF YOU WOULD LIKE TO ASSIST IN THE WORK OF REFORESTATION AND RECLAIMING OF THESE WASTE AREAS, we will gladly send you additional copies of this Betz-Boyd News for free distribution in your section.

Lawyers

Nobody knows land values better than a lawyer. In his capacity as adviser and legal guardian he often is called upon to decide about mortgages and foreclosures.

Every lawyer can tell you of cases where the value of property decreased each year until it was no longer worth the amount of the first mortgage. In many cases this could have been avoided and the land would actually have increased in value each year if soil conservation had been practised.

Many lawyers have ordered from us each year themselves. They have learned that they can have many hours of pleasure out of doors growing plants and trees and that they will also show a substantial profit on the investment.

Boyd's

FOREST TREE SEEDLINGS *for Reforestation*

"What can I do?" is the slogan of all patriotic citizens in these perilous times of war. For those who must do their bit at home or on the farm . . . why not join the army of reforestation? We need billions of trees planted throughout the United States for the use of Shade, Timber, Fuel, to help provide moisture, to stop soil erosion, and to supply homes for insect-eating birds. There is hardly a farm without a bit of idle land that could not be planted to Forest Tree Seedlings.

Our Tree Seedlings are well rooted and will grow fast. These sizes are inexpensive and easily transplanted. See regular tree list on page 7 for descriptions.

How to Plant Seedlings

If your ground is suitable use a plow, open a deep furrow. If not possible to use a plow, then stake your ground off in rows and set with a digging hoe. Be sure the roots have ample depth, pack the soil with foot about the roots, in order to close up air pockets. When your trees arrive they will be in bundles. Open a trench and place the roots in the trench and fill dirt about the roots. In case the weather is bad you can keep the plants in good condition.

WIN A VICTORY BOND!

Tulip Tree Or Yellow Poplar

When you want lumber for building you will look far before finding any better than yellow poplar. Examine your farm and see if you have areas that are producing nothing for you. Perhaps they are well suited to growing yellow poplar. If not, they will grow some other good tree; put these idle lands to work for you instead of letting them keep you working for them. You pay the taxes and bear the loss which the poor appearance and worthless condition impose upon your farm.

Black Locust

Your farm will always need fences. Your fences will always need posts. The black or yellow locust grows the best of posts and quickly. Make your idle or waste land produce these needed posts. The black or yellow locust will grow on your waste or idle lands, will cover them up, will stop them from washing away, and will make the land rich and yield you a profit all at the same time. What better would you want?

Black Walnut is One of the Most Valuable Timbers Grown in the United States

Grow a black walnut orchard on your farm. The trees will produce the finest, the most valuable timber, and at the same time yield quantities of the richest nuts, whose kernels are marketed in abundance at a good price. You have, at least, "odd nooks" on your farm that will grow a few trees, if no more; let them grow walnuts for you.

Feed the Birds

Berry Bearing Plants For Birds

Berry-bearing plants furnish food for song and game birds. With berry-bearing plants around your place you can make the birds contented, you can study them from your window, and you can enjoy their songs. The birds will stay as long as the berries are there, so have plenty, for birds are of the greatest value in curbing insect damage.

Beautiful FLOWERING SHRUBS

French Lilacs

These wonderful new Lilacs start blooming very young, usually the same year that they are planted, enormous large cluster of flowers that will measure from ten to twelve inches in length. Very nice for cut flowers. We offer some of the choice varieties.

Michael Buckner. Real large clusters of double florets, buds deep pinkish lilac opening to a blue-lavender. This is a great favorite with all gardeners.

Charles X. One of the older varieties and one of the best. In great demand because of its profuse blooming qualities. Violet-red in color and unsurpassed for cut flowers.

William Robinson. One of the best of all the Lilacs and it is the best of the Dark Purple Lilacs. This is also used for cut flowers.

Hugo Kuster. Reddish-Purple in color. Very large flowers, ideal for cut flowers as they are born in large clusters.

Jan Van Tol. Large snow-white flowers in compact clusters.

Prices on Lilacs:

	Each	Per 3	Per 10
12 to 18 in.	\$.35	\$1.00	\$2.75
18 to 24 in.50	1.25	3.75
2 to 3 ft.60	1.60	4.75

Althea. A large growing shrub; flowers appear in the late summer.

	Each	Per 10	Per 25
18-24 inch tr.	\$.20	\$1.50	\$3.00
2-3 feet tr.25	1.75	3.50

Aronia. The leaves are smooth green, turning vivid red in the fall; red or black fruit in the late fall.

	Each	Per 10	Per 25
12-18 inch tr.	\$.20	\$1.50	\$3.00
18-24 inch tr.30	2.25	4.00
2-3 feet tr.35	2.75	5.50

Barberry, Green-leaf. This is the green leaf type, turning to brilliant autumn coloring; red berries in the fall; good as specimen or hedge planting.

NOTICE!

Hand this special price list to your friends, but do not do so until you have sent in your own order. Your friends will thank you for it, and we will THANK YOU, TOO.

Or better yet, when you send in your order send to us the names of those whom you think will want one of our catalogues and we will gladly mail them one.

Deutzia Pink

Spiraea Van Houttei

Red Delicious

APPLES

"The King of All Fruits"

This is the number one fruit of America and you can have Apples from your orchard in three to four years. Apples help build your health. Do your part by planting a few of these trees.

SUMMER APPLES

ANOKA. One of the quickest apples known to bear fruit. Large fruit, dark red and good flavor. Fresh apple pie in two years after planting.

EARLY HARVEST. Ripens in early part of July. Waxed yellow color, juicy and good quality.

YELLOW TRANSPARENT. The favorite yellow summer apple. Excellent for eating and cooking.

YELLOW HORSE. The best summer, yellow cooking apple. Large yellow, fine flavor.

AUTUMN APPLES

KINNARDS CHOICE. The good, large, dark red fall apple that markets good everywhere.

GRIMES GOLDEN. The best Yellow Apple for fall marketing. Full of rich, spicy flavor.

WINTER APPLES

RED STAYMAN WINESAP. An improved Winesap. Excellent for market, cider and eating.

RED DELICIOUS. Sometimes called the King of all Apples. Delicious flavor, full of juice and a wonderful keeper.

YELLOW DELICIOUS. One of the finest flavors of all apples. Yellow rich color.

WINESAP. One of the old timers. A red apple with excellent flavor and one of the best apples to put up for home use or to put on the market.

Boyd's FRUIT TREES

Plant Fruit Trees and Help Defense!

This is one way we can help win the war by growing more food for home consumption and for our Army of Americans and our Allies. Plant now and in two or three years you will have fresh fruit for your table. Do your part by planting a Victory Orchard.

Concord

GRAPES

The increase in demand for wines and beverages makes this one of our most popular fruits. It is easy to grow and bear quickly. Keep in mind when planting that they only produce fruits on the new growth and so pruning is necessary any time between November and March when the plant is completely dormant.

DELAWARE. Red Grape. Early mid-season; good size; flesh juicy, very sweet.

CATAWBA. Red Grape. Very late; keeps better than any grape in cultivation.

NIAGARA. White Grape. It is the most popular of all white grapes.

CONCORD. Black Grape. The most popular of all grapes. It does well all of the U. S. A.

WORDEN. Black Grape. Larger and earlier than the Concord.

Prices on Grapes.

Boyd's Delicious Cherries

Every Home Should Have Some Cherry Trees!

Cherries is the nation's favorite fruit for making pies and is highly prized for canning and preserving. Can be grown anywhere except on low, wet ground. Their fragrant blossom is the first sign of spring.

Sweet Cherries

BLACK TARTARIAN. A large, purplish red, juicy

Early Richmond

sweet cherry. One of the best for home use.
GOVERNOR WOOD. Pale yellow fruit with bluish. One of the best in quality and produces an abundance of fruit.

Sour Cherries

EARLY RICHMOND. The favorite early cherry for those delicious cherry pies. It produces a heavy crop of rich flavored red fruit.

MONTRENCY. This is the best of the sour cherries for canning. Beautiful large red fruit that is ready for home use and the market about ten days later than the Early Richmond.

Prices on Cherries.

	Each	Per 10	Per 100
18 to 24 inch, branched	\$.40	\$3.50	\$30.00
2 to 3 feet, branched	.50	4.50	40.00
3 to 4 feet, branched	.75	6.50	60.00
4 to 5 feet	.90	8.00	70.00

Bush Cherry

This new Cherry is becoming the nation's favorite fast. It produces fruit about the second year after transplanting. Tree is of dwarf habit and fruit can be easily picked. They should be planted close to a plum tree for pollenizing.

OKA CHERRY. The hardy Black Cherry. A grand sweet cherry, fruit is purplish-red and wonderful, rich, sweet flavor. It can be planted on the lawn or in the garden. Makes delicious pies and is very desirable for preserving.

Prices on Oka Cherry:

	Each	Per 10	Per 100
12 to 18 inch	\$.20	\$1.75	\$15.00
18 to 24 inch	.25	2.25	20.00
2 to 3 feet	.30	2.75	25.00

APRICOTS

This is one of the most delicious of all fruits. To buy them at your grocery store they are very expensive but you can grow them at very little cost. Very desirable for eating fresh and they are prized highly for canning.

EARLY GOLDEN. Fruits just after the cherries and just before peaches. Pale orange in color, juicy, sweet and good.

MOORPARK. Fruit is larger than the Early Golden. Yellowish green fruit and red on the sunny side.

Prices on Apricots.

	Each	Per 10	Per 100
18 to 24 inch	\$.20	\$1.75	\$15.00
2 to 3 feet	.25	2.25	20.00

Early Golden Apricot

Elberta

PEACHES

The Peach is the youngest bearing of all fruit trees. An investment now in Peach Trees will sure bring quick returns and nice profit. Peach trees usually bear the second year after transplanting. Plant some of these Freestone or Clingstone Peaches now.

Early Peaches

CRAWFORDS EARLY. One of the best early peaches. Clear yellow fruit with bluish.

EARLY ELBERTA. A strong grower and produces an abundant amount of yellow fruit.

MAYFLOWER. Extra early peach. Large, red flesh, white skin, rich and juicy flavor.

EARLY ROSE. Large red fruit, rich and juicy flavor.

Mid-Summer PEACHES

BELLE OF GEORGIA. Large white fruit with decided bluish. A very heavy and regular bearer.

J. H. HALE. Flesh yellow and sweet. Excellent for canning and shipping. Largest commercial Freestone.

GOLDEN JUBILEE. Fruit is large, bright apricot-orange in color with brilliant red cheek. A delicious flavor.

HALE HAVEN. The one peach that has never failed to yield a full crop. A cross between the J. H. Hale, which is so large, and the South Haven, which is very fertile.

SOUTH HAVEN. One of the hardiest and fertile peaches on the market; produces when other trees fail. Deep yellow fruit.

SHIPPERS RED. This peach is becoming more popular each year because of its flavor and canning.

Late Peaches

ELBERTA. The most popular of all peaches. Every orchard should have a few of these trees. A large oblong peach, yellow fruit with bluish.

CRAWFORDS LATE. Large, round, yellow fruit with bluish. One of the best late freestones.

Clingstone Peaches

HEATH CLING. The largest of all Clingstone peaches. This creamy white peach is excellent for preserves.

INDIAN BLOOD CLING. The best of all peaches for making pickles. Its dark red flesh is very outstanding and delicious.

RED BIRD CLING. One of the first peaches on the market makes this peach very profitable. Fruit is large and bright glowing red in color.

Magnolia Nigra

Trees Gone, "Goodbye Birds"!

When the trees are gone there will not be a place for the birds to nest, which means more woes for people who have farms, yards and lawns. There will be more abandoned farms, more people to be taken care of by the taxpayers. These BIRDS SAVE farmers over \$100,000,000 yearly.

"GOVERNMENT experts report that, if all birds were exterminated today there would not be a man, woman or child alive in three years.

"Many birds will eat their weight in insects daily. A pair of birds and their young have been found to consume from 300 to 10,000 insects in a single day. In the stomach of a single flicker Government experts found 5,000 ants. Martins and Swallows have been known to consume on an average of 3,000 mosquitoes in a day. It is claimed that one family of Jays will consume 1,000,000 caterpillars in a season. Sparrows are accredited with saving the farmers of this country more than \$100,000,000 annually by their destruction of insects and weed seed. It is estimated that in Massachusetts alone birds destroy from May until September 21,000 bushels of insects daily and in New York 3,000,000 bushels annually.

"This study has entailed the sacrifice of 75,000 birds, but through it there has been established beyond question their economic worth. Man sees them now as the world's greatest combat force in the struggle with insects. Many previously accounted of but little worth are now recognized as winged battalions that since the beginning of time have hung between man and his insect enemies.

"This enormous consumption of insects and weed seed is made possible because of the rapid digestion of birds. Food, it is stated, passes through the process of digestion in birds in from twenty to ninety minutes."

Trees Gone—"Hello, Chinch Bug"!

"When we are discussing land erosion the chinch bug may seem to be immaterial and highly significant. Having arrived, not only in Iowa, our richest farming state, but also in Missouri, Indiana and Illinois, by billions of millions, and having done more in thirty days to restrict barley than the A.A.A. has accomplished in two years, he is not only significant of the drought of this year, but, which is truly ominous, he is distinctly prophetic of another dry spell for next. In short, he is just a warning symptom of what we are coming to in case we keep on destroying our topsoil.

"Moisture is the only thing that kills him; our topsoil is the only thing that conserves our moisture. Consequently, when it is gone, or when most of it is, and with it most of the earth's moisture, the only cultivated thing then that this little pest won't kill when he touches it will be the soy bean. That sounds like China. Over there, because the chinch bugs won't eat soy beans, the Chinese must, and, as things are now going, how long will it be until we are on the same diet?"

ERODED GULLIES that look beyond redemption can be completely restored by the use of Hall's Honeysuckle. Hall's Honeysuckle is being used extensively by railroads to hold steep banks, also the Highway Departments of many states have found Honeysuckle to be the most satisfactory for checking erosion. Kudzu Vine is good for the same purpose and also fine for hay and pastures.

Honeysuckle, Hall's. Strong, vigorous vine with fragrant white and yellow flowers in late spring and summer. Excellent ground cover and bank retainer.

Boyd's ORNAMENTAL SHADE TREES

To Understand More About Trees, Read the Poem About "Trees." Plant Them For Beauty, Comfort and Profit. Enjoy the Comfort That Trees Will Give You On Your Lawn. Boyd Trees Are Healthy and Strong Rooted.

Silver Maple. A very rapid growing tree of graceful habit. Leaves very similar to the Sugar Maple except they have a silver color beneath. They will thrive in almost any kind of soil.

	Each	Per 10	Per 100
4 to 5 feet	\$.50	\$3.50	\$25.00
5 to 6 feet	.65	4.50	35.00
6 to 8 feet	.75	6.00	50.00
8 to 10 feet	1.00	7.50	65.00

Norway Maple. The most rapid growing of the Hard Maples. A beautiful well rounded shape top densely covered with dark green lustrous leaves turning to bright scarlet and yellow colors in the Fall. One of the best street or lawn trees.

	Each	Per 10	Per 100
5 to 6 feet	\$1.00	\$7.50	\$65.00
6 to 8 feet	1.25	10.00	85.00
8 to 10 feet	1.50	12.00	100.00

Sugar (Hard) Maple. One of the best known of all lawn trees. Perfectly hardy and a grand form with large foliage of rich green that turns to a showy orange and red shades in the Fall.

	Each	Per 10	Per 100
4 to 5 feet	\$1.00	\$7.50	\$65.00
5 to 6 feet	1.25	10.00	85.00
6 to 8 feet	1.50	12.00	100.00

Basswood, American Linden. Large glossy leaves that give a splendid shade for the lawn and street. It has a nice compact top which makes it one of the most beautiful of all lawn trees.

	Each	Per 10	Per 100
4 to 5 feet	\$1.00	\$7.50	\$65.00
5 to 6 feet	1.25	10.00	85.00
6 to 8 feet	1.50	12.00	100.00

Magnolia Tripetala (Umbrella Tree). The very large leaves give this tree a tropical like appearance. The leaves will measure sometimes from 15 to 20 inches in length. This makes a very beautiful lawn tree and makes one of the best shades.

	Each	Per 10	Per 100
4 to 5 feet	\$.75	\$6.00	\$50.00
5 to 6 feet	1.00	7.50	65.00
6 to 8 feet	1.25	10.00	85.00
8 to 10 feet	1.50	12.00	100.00

Sweet Gum. This is one of our most beautiful trees. The leaves resemble the maple leaf very much and the body of the tree is covered with a corky bark which is very attractive. The leaves of the sweet gum are most attractive in the fall when they turn to many brilliant colors.

	Each	Per 10	Per 100
4 to 5 feet	\$.75	\$6.00	\$50.00
5 to 6 feet	1.00	7.50	65.00
6 to 8 feet	1.25	10.00	85.00
8 to 10 feet	1.50	12.00	100.00

American Ash. A lofty tree with spreading branches forming a round topped crown. Foliage dark green and lustrous fading in autumn with tones of purple and yellow.

	Each	Per 10	Per 100
4 to 5 feet	\$.60	\$4.50	\$35.00
5 to 6 feet	.75	6.00	50.00
6 to 8 feet	1.00	7.50	65.00

CHINESE ELM

Chinese Elm. The most popular of all trees in America. Also it is one of the fastest growing trees known. A hardy tree that grows into a compact shape with slender branches and small leaves. Plant some of these hardy trees at once.

	Each	Per 10	Per 100
4 to 5 feet	\$.75	\$6.00	\$50.00
5 to 6 feet	1.00	7.50	65.00
6 to 8 feet	1.25	10.00	75.00
8 to 10 feet	1.50	12.00	100.00

Weeping Willow

Lombardy Poplar. One of the best trees known for tall screens and backgrounds. Its branches to the ground and is columnar in shape, it should be planted about 6 feet apart to make a good screen.

	Each	Per 10	Per 100
4 to 5 feet	\$.40	\$3.50	\$25.00
5 to 6 feet	.60	4.50	35.00
6 to 8 feet	.75	6.00	50.00

American Sycamore. A rapid growing tree and will make an excellent tree for park and street tree because of its resistance to smoke and gases. It grows to be a very large tree.

	Each	Per 10	Per 100
4 to 5 feet	\$.50	\$3.50	\$25.00
5 to 6 feet	.75	6.00	50.00
6 to 8 feet	1.00	7.50	65.00
8 to 10 feet	1.25	10.00	80.00

Tulip Poplar Tree. It grows to be straight and tall and is considered as one of the most attractive lawn and street trees because of its handsome foliage and the large tulip-like flowers it produces. It is also very valuable for lumber.

	Each	Per 10	Per 100
4 to 5 feet	\$.60	\$4.50	\$35.00
5 to 6 feet	.75	6.00	50.00
6 to 8 feet	1.00	7.50	65.00

Willow, Weeping. A handsome weeping tree that is splendid for formal effects. Its leaves remind you of a lacy effect. One of the best of all weeping trees.

	Each	Per 10	Per 100
4 to 5 feet	\$.60	\$4.50	\$35.00
5 to 6 feet	.75	6.00	50.00
6 to 8 feet	1.00	7.50	65.00

FREE OFFER

With every order of \$10.00 or more we will include 5 Silver Maple and 5 fast-growing Chinese Elm 18 to 24 inches. If your order amounts to \$25.00 or more we will include 10 fast-growing Chinese Elm and 10 Silver Maple. This is our gift to you, to encourage larger orders. Remember the gifts and mark them on your order or we might overlook including them.

Are you helping to win the war? Buy Defense Bonds! Plan and Plant for the Future.

NUT TREES

NUT TREES. There is a growing demand for nuts for table use and for commercial purposes. No home should be without a few nut trees for home consumption.

Pecans. Plant Pecan trees for profit and for shade. They will pay dividends in five or six years after planting if properly handled, and will increase in value as they grow older. We offer the best varieties, bearing nuts of large size, good flavor and thin shell.

Moneymaker. Extra good, heavy producer.

Schley. Nuts of highest quality and very thin shell.

Stuart. Extremely hardy; nuts good size, plump and well filled.

Success. Resembles the Stuart, only larger. Note excellent flavor.

	Each	Per 10
2-3 feet	\$.55	\$5.00
3-4 feet	.65	6.00

Hazelnuts. Or American Filberts. A shrubby ornamental tree producing abundant crops of delicious nuts, which are in great demand at good prices.

	Each	Per 10
2-3 feet	\$.25	\$1.85
3-4 feet	.35	2.75

American Chestnut. A grand old forest tree, not so numerous now as once they were; fine for shade; also valuable commercially, nuts sweeter than any other variety.

	Each	Per 10
2-3 feet	\$.50	\$3.75
3-4 feet	.75	5.50

Hickory Nuts. Very valuable for market in nuts and also the lumber is very valuable for spokes, fence posts, and handles of all kinds for farming tools.

	Each	Per 10
18-24 inch	\$.35	\$2.50
2-3 feet	.50	3.50
3-4 feet	.60	5.50
4-5 feet	.75	6.50

Siberiana Walnut. Hardy, grows rapidly and makes a handsome tree. Bears young; the nuts are borne in clusters, resembling the Butternut, with a thinner, smoother shell.

	Each	Per 10
18-24 inch	\$.35	\$2.50
2-3 feet	.50	3.50

Black Walnut. The most rapid-growing hardwood tree known. One of the most beautiful lawn or shade trees, but its chief value is the large nuts it begins to produce after the third or fourth year from planting. Trees extremely hardy and may be successfully grown in any section of the United States. The wood from this tree takes a fine polish, superior to any of our native timber. There is a fortune in growing this tree for timber.

	Each	Per 10	Per 100
3-4 feet	\$.25	\$1.85	\$15.00
4-5 feet	.35	2.75	25.00
5-6 feet	.50	4.00	35.00

Wire Fencing Cannot Be Bought, So Plant THORNY HEDGES FOR FARM FENCES

Osage Orange. A hardy tree widely planted for hedges. Stands clipping remarkably well and forms an almost impenetrable barrier when properly cared for. The Osage Orange makes a beautiful tree when planted in rich loamy soil, and is peculiarly attractive in the autumn when loaded with the large yellow-green orange-like fruits.

	Per 25	Per 100	Per 250

Boyd's VINES and CREEPERS

Well Placed Vines Add Untold Beauty and Charm

Bittersweet

We are offering a comprehensive collection of the hardiest and best vines and creepers—those that have real merit and sterling worth. The vines and creepers are especially desirable for covering walls, unsightly places and rock walls and buildings.

Bittersweet, American. Glossy leaves; large clusters of orange-scarlet berries. A favorite winter decoration.

	Per 25	Per 100	Per 250
1 year seedlings	\$1.00	\$3.00	\$6.00
2 year seedlings	1.75	5.00	9.75

Bittersweet, Oriental. Dense semi-evergreen foliage. Large clusters of small orange-yellow seed pods, with red berries. Very attractive to birds.

	Per 25	Per 100	Per 250
1 year seedlings	1.25	3.50	6.75
2 year seedlings	2.00	6.00	12.00

Clematis, Virginiana. White flowers in late summer. Valuable for training over verandas, fences and rock work.

	Per 25	Per 100	Per 250
1 year	2.00	6.00	12.00

Crossvine. Trumpet-shaped flowers of orange and yellow in late spring. Evergreen.

	Per 25	Per 100	Per 250
2 year	1.50	4.00	8.00

Dutchman's Pipevine. Large overlapping, dull green leaves form a dense screen. Odd-shaped brown flowers give the plant its name.

	Per 25	Per 100	Per 250
1 year	1.50	4.00	8.00

Grape, Fox. Berries large, purple-black. Often gathered for making delicious highly-flavored jam or jelly.

	Per 25	Per 100	Per 250
1 year seedlings	1.00	3.00	6.00

Grape, Frost. High-climbing vine, ascending to the tops of tall trees. Black berries.

	Per 25	Per 100	Per 250
1 year seedlings	1.00	3.00	6.00

Grape, Muscadine. Grows rapidly and fruits are good to eat; have a peculiar musky flavor.

	Per 25	Per 100	Per 250
1 year seedlings	.90	2.25	4.25

Grape, Summer. Leaves green above, coated beneath with brown felt-like down. Berries black.

	Per 25	Per 100	Per 250
1 year seedlings	.90	2.25	4.25

Honeysuckle, Scarlet Trumpet. Large bright green leaves, showy large red-coral trumpet flowers.

	Per 25	Per 100	Per 250
Medium	.75	2.00	4.00
Transplants	2.00	6.00	11.75

Passion Flower. Fast-growing vine with deeply cut sea-green leaves and curious blue flowers, which were supposed by the early Spanish travelers in South America to be symbolic of the passion of our Lord.

	Per 25	Per 100	Per 250
1 year seedlings	.90	2.25	4.25

Wisteria

Trumpet Creeper. Showy trumpet-shaped flowers of scarlet and orange in summer.

	Per 25	Per 100	Per 250
1 year	\$.75	\$2.00	\$4.00
Transplants	2.00	6.00	11.75

Virginia Creeper. Rich fiery autumn color in the large five-lobed leaves. Fast grower.

	Per 25	Per 100	Per 250
1 year seedlings	1.00	3.25	7.50
Transplants	2.50	8.00	15.75

Vinca Minor. Glossy oblong leaves and single blue flowers. A good ground cover plant, sometimes called "grave vine." Evergreen; thrives in shady places.

	Per 25	Per 100	Per 250
1 year	.90	2.25	4.25
Transplants	2.25	7.50	14.75

Wisteria, Chinese Blue. Rampant clinging vine with flowers in large, drooping clusters.

Wisteria, Chinese White. Same as Chinese Blue, except the flowers are white.

	Per 25	Per 100	Per 250
1 year seedlings	1.75	5.00	9.75

Two Good Ground Covers

Honeysuckle, Hall's. Strong, vigorous vine with fragrant white and yellow flowers in late spring and summer. Excellent ground cover and bank retainer.

	Per 25	Per 100	Per 250
Medium	\$.75	\$2.00	\$4.00
Transplants	2.00	6.00	11.75

Kudzu Vine. The most rapid-growing twining vine known today. Leaves compound, flowers pea-shaped, purple, in late summer. It is marvelous how it will cover fences, pergolas, or similar objects.

	Per 25	Per 100	Per 250
2 year seedlings	.90	2.25	4.25
Transplants, heavy	2.25	7.00	15.00

Smaller Plants of FLOWERING SHRUBS

For Hedges, Etc.

These are all well-grown and well-rooted. Within a few years they will be specimen shrubs. See descriptions under Flowering Shrubs.

Hedge Plants

A small amount of money invested in beautiful hedges will add more value to a country or town property than any other investment. Plant a hedge fence. It will cost you less than the cheapest fence you can build, and will look better than the costliest fence you can build. Nothing is more attractive than a neatly trimmed hedge along the borders of property. A walk or drive bounded by hedges is charming.

Privet Amur River South (Southern Evergreen). The most popular of the privet in the South which is almost evergreen. Rich green foliage, compact in growth. Do not plant north of the Ohio River.

	Per 25	Per 100	Per 250
12-18 inches, branched	\$.75	\$2.50	\$5.00
18-24 inches, branched	1.00	2.75	6.00
2-3 feet, branched	1.25	4.50	8.00

Privet Amur River North. A valuable plant for hedges and borders, which is very hardy in any section. It has large green leaves that will stand trimming to almost any extent.

	Per 25	Per 100	Per 250
